Mini Calendar

Web Part Features Version: beta

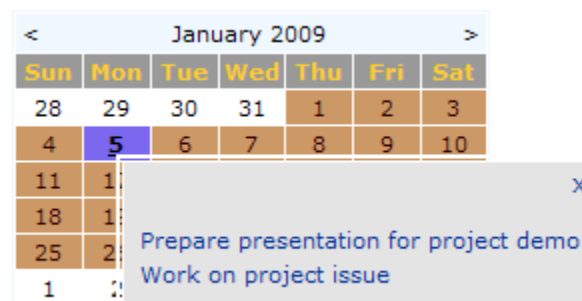

Mini Calendar provides the following features:

- Highlighted dates having list items (tasks, announcements etc.) fall under that date.

- Quick display of events, task or any other items from a SharePoint list.

To look at items which fall under a particular highlighted date, hover the mouse over that particular date and you will see a panel pops up which lists all the list items. To look at the item details, click on the particular item's link and you will be redirected to the item details page for that item.

- Quick addition of list items.
For adding a new item to the currently configured list, click on any of the day and you will be redirected to the 'add new item' page for the current list (in case of list other than document library) or to 'upload new document' page (in case of document library type of list).
- Quick addition of List, announcements and many other type of lists
- Selection of column to display in the calendar from the available columns in selected lists.
- Viewing list item data in detail on a single click.
- Option to customize the calendar look and feel.

By default, the MiniCalendar Web Part renders with the default style. Look and feel of the Web Part can be further customized by modifying following properties while configuring the Web Part.

15 Corporate Pl S, Suite 341, Piscataway, NJ 08854
